CISA Launches New Threat Detection Dashboard

Aviary is a new dashboard that works with CISA's Sparrow threat detection tool. The US Department of Homeland Security's Cybersecurity and Infrastructure Security Agency (CISA) is launching another security tool to help organizations mitigate threats like those posed by the recent SolarWinds supply chain attack discovered in December.

Secure AWS Fargate Serverless Containers At Scale

AWS Fargate is a popular choice for running serverless containers, but runtime security is still a major challenge. Without access to the underlying host, visibility to threats is limited, leaving organizations blind to security risks. Detection and response often come with a lot of overhead or inaccuracies, leaving teams frustrated with the coverage.

Cyber Threat Landscape

Nation-states and cyber-criminals continue to target our companies, people, and interests. Over the past year, as the COVID-19 pandemic pushed us to change how we live and work, our adversaries have evolved to better target us both directly and through the supply chains we rely on.
